University Of Jaffna(Vavuniya Campus) • Vavuniya • 08/2021 – 07/2024

CERTIFICATIONS

NDG Linux Essentials

CISCO

PROJECTS

Hostal Management System

This is my second-year, second semester project. I did this project using C# language and Visual Studio. It is a simple application. Using this application, students can provide their vacate hostel information, and the warden can see that information.

This application is an attempt to avoid the inconvenience faced by the students while leaving the hostel and the inconvenience caused by the warden.

Event Ticket Booking System

This is my third-year group project. I did this project using React Js for the front-end and Java Spring Boot for the back-end. We did this project for university events. Through this system, we hope to include all the events at the university and give students the opportunity to book their tickets through it.

Joke Sharing Appication

It is a simple **CRUD** operation application. I used C# and ASP.NET for development.

SKILLS

C#, CSS, HTML, Java, React Js
